Kode : 046C9OZ

The screenshot displays the Visual Studio Code interface with a Java project named 'Orang.java'. The Explorer panel on the left shows the project structure, including a 'src' folder containing several Java files: Dosen.java, Gedung.java, Kantor.java, Orang.java, Pegawai.java, Ruang.java, and unitKerja.java. The main editor window shows the code for 'Orang.java', which is an abstract class. The code includes private attributes 'nama' and 'tanggalahir', a constructor 'Orang(String nama)', and several public methods: 'setnama', 'getnama', 'settanggalahir', 'gettanggalahir', 'getgaji', and 'getalamat'. The status bar at the bottom indicates the current line and column (Ln 8, Col 1) and the file encoding (UTF-8).

```
1 abstract class Orang {
2     private String nama;
3     private Date tanggalahir;
4
5     public Orang() {}
6
7     public Orang(String nama) {
8         this.nama = nama;
9     }
10
11     public Orang(String nama, Date tanggalahir) {
12         this.nama = nama;
13         this.tanggalahir = tanggalahir;
14     }
15
16     public void setnama(String nama) {
17         this.nama = nama;
18     }
19
20     public String getnama() {
21         return nama;
22     }
23
24     public void settanggalahir(Date tanggalahir) {
25         this.tanggalahir = tanggalahir;
26     }
27
28     public Date gettanggalahir() {
29         return tanggalahir;
30     }
31
32     public void getgaji() {
33         System.out.println("gaji kosong");
34     }
35
36     public abstract String getalamat();
37     public abstract void setalamat(String alamat);
38 }
```
